

WATERLESS™

No-Flush™ Urinals

HIGH PERFORMANCE COMPOSITES OF VITREOUS CHINA

Professional Conservation™

EcoTrap® Inside!

Santa Fe™

Model # 2903

- Waterless
- High Performance Composite
- Home/Small Space Application

Waterless No-Flush™ Urinals are the perfect answer to rest room maintenance problems, vandalism and high traffic water/sewer use. No-Flush™ Urinals work completely without water or flush valves. Due to the dryness of the fixture, bacteria growth is inhibited and odors are eliminated through the minimal use of BlueSeal®. Our patented vertical EcoTrap® is the simple solution. The #2903 Santa Fe™ is a High Performance Composite urinal with a bottom drain outlet, manufactured in the USA. Waterless Co. LLC, now in its second decade, is the leader in lowest long term operating cost for urinals in the industry. High traffic facilities benefit the most from our fixtures as maintenance is vastly reduced, vandalism virtually eliminated, encrustations minimized plus the rest room atmosphere is not disturbed by foul odors. Waterless No-Flush™ Urinals are LEED® applicable, have a short payback period of between one and three years and save up to 45,000 gallons of water and sewer usage per urinal per year. Our installations are our best references.

KEY FEATURES

- Odorless
- Sanitary & More Hygienic
- Less Costly to Operate than Flushed Urinal
- Touch-Free
- No Flushometer
- No Valve Repairs
- No Pressure Requirements
- No Overflows or Stoppages
- LEED® Applicable
- No Deodorizers Needed
- Upgrades Facility
- Minimizes Sewer Line Encrustations
- Minimizes Waste Volume
- Reduced Risk Exposure
- Requires Less Man-Hours
- Improves IAQ
- Reduces Peak Loads
- Reduces Vandalism
- 2 inch Interior Drain Line

APPLICATIONS

- Institutional
- Commercial
- Industrial
- Military
- Airports
- Hospitals
- Offices
- Schools, Colleges
- Parks, Rest Stops, Playgrounds
- Sport & Rec. Facilities, Camps
- Portable Applications
- Maritime Applications
- Trains / Buses
- Home / Small Space Application
